SUMMARY

Frontend developer with experience in building robust well-finished quality Javascript applications.
I enjoy learning about different frameworks and libraries in my free time. An eager and conscientious employee who works well in team environments.

EXPERIENCE

Senior Frontend Engineer @ Brubank SAU August 2022 - Present, BsAs, Argentina

- Started working after I got laid off from my previous job.
- Worked doing maintenance and adding new features to the legacy backoffice made in Preact JS (version 8).
- Worked updating fees and legal writings on the marketing page brubank.com.
- Worked migrating the old backoffice to the new version made in React.
- Worked on the Businesses onboarding flow.

Senior Frontend Engineer @ Blockchain.com January 2022 - July 2022, BsAs, Argentina

- Started working when my previous work engineering branch was acquired by blockchain.com.
- Developing, improving and creating React components using Redux, Sagas and TypeScript for the company's non-custodial wallet's staking and rewards section.

Senior Frontend Engineer @ Elementum SCM August 2017 - January 2022, BsAs, Argentina

- Worked for the company's IAM (Identity and Access Management) team and helped on building the company's BO (back office) app which had different security level roles.
- Optimized and enhanced company's app for managing client's (Corning, Starbucks, Philips, Dyson, BASF, Barilla, etc) incidents and sensitive data.
- Lead and created a new React app from scratch to manage customers warehouses, shipments and inventory and show a summarized panel with key information using DRY and KISS philosophy.
- Created a useful component library using Webpack new Federation Module to ensure code reusability and one time loading dependencies.

Senior Frontend Engineer @ Globant August 2010 - September 2017, BsAs, Argentina

- Drop some major quality for Deloitte on an internal project for resource management written in AngularJs (1.59) using components composability, SCSS and unit testing.
- Hands on the 2.0 site for Walt Disney Company on their rework for desktop, and responsive of "Disney Cruise Line", "Visa Instant Credit", "FastPass Plus", "FastFood Plus", "My Disney Experience Itinerary" and "Disney Online Check In" using AngularJs, PHP, SCSS and SASS.

Webmaster and Community Manager @ Gameloft.com May 2008 - August 2010, BsAs, Argentina

- Basic procedural development for publishing documents, games for all platforms and media coordination with the creative department.
